描述			
The activation of FAN can be configured by the parameter ‘ FAN_Activation_Trigger_cfg ’ . 0x00: No FAN 0x01: Activate upon Ignition On 0x02: Activate upon LB or HB is activated 0x03: Activate upon FAN NTC temperature is > ‘ Fan_Activation_Temp_cfg ’ If ‘ FAN_Activation_Trigger_cfg ’ = 0x03 which means FAN will be activated when the temperature is more than the function threshold, ‘ FAN_Activation_NTC_cfg ’ and ‘ Fan_Activation_Temp_cfg ’ should be enabled to choose which NTC source and the temperature threshold should be used. If the temperature recover from a high temperature to low temperature, a 5°C hysteresis should be applied. ‘ FAN_Activation_NTC_cfg ’ definition: 0x00: NTC1 0x01: NTC2 0x02: NTC3 0x03: NTC4 ‘ Fan_Activation_Temp_cfg ’ definition: - Range: 50°C to 100°C - Resolution: 5°C If the FAN NTC is lost or out of range, Fan shall be activated if any lighting sources is activated.
